***Response to Arguments***

- 5 Applicant's arguments filed 23 July 2007 have been fully considered but they are not persuasive with regards to Claim 22.

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:  

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. It is unclear to the Examiner, what necessary steps are being used to create a forgery-proof document. For example in Claim 20, the Applicant recites the steps wherein a first combination machine arranged to combine an output value of the identification register, an encryption machine arranged to encrypt an output value of the first combination machine. However, neither of these steps are actually performing any function plus means step. Therefore, it is unclear as to what the step of using a security module is providing to the method steps of claim 22.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 22 is rejected under 35 U.S.C. 102(b) as being anticipated by Elsner (U.S. Patent No. 5,150,409).

Referring to claim 22, Elsner discloses the claimed limitation wherein producing a forgery-proof document, comprising:

using a security module (See Column 16, lines 67-68, Column 17, lines 1-3)  
providing the output of the second combination machine as forgery-proof  
information to the forgery-proof document, (See Column 16, lines 43-51)  
and issuing the forgery-proof document (See Column 17, lines 37-47)

***Allowable Subject Matter***

6. Claims 20-21, 23-24, and 30-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
